PROFESSIONAL OVERVIEW

Full-stack software developer with 2.5+ years of hands-on experience building and maintaining scalable web applications across JavaScript, Node.js, Angular, React, .NET, Python and Drupal ecosystems. Experienced in product development, backend APIs, blockchain-related systems, and enterprise tooling. Known for strong problem-solving, clean code, and quickly ramping up on new technologies in fast-paced teams.

WORK EXPERIENCE

Junior Software Engineer

Elastik Teams, New Orleans | June 2025- Present

- Developing a **full-stack end-to-end proposal management system** using **Node.js (backend)** and **Angular (frontend)**, supporting business workflows and automation.
- Maintaining and enhancing a **.NET Framework 4.5 billing system** used for Iron Hide systems, ensuring reliability and accurate transaction handling.
- Managing and maintaining a **Drupal-based website** for an association's **ALA programming librarian platform**, including content updates and performance fixes.

Software Development Intern

Elastik Teams, New Orleans | Jan 2025- June 2025

- Gained hands-on exposure to **Microsoft Azure fundamentals**, including cloud concepts, services, and deployment basics.
- Worked with **Power BI** to understand data visualization, reporting, and business insights.
- Supported internal technical teams by assisting with tooling, documentation, and exploratory development tasks.

Blockchain Junior Developer

OpenScanAI | Aug 2024- Jan 2025

- Worked on the company's core blockchain product **xdscan.io**, contributing to feature development and enhancements.
- Worked on company's product XDCRemix used to create blockchain contracts. Create a feature that helped use both addresses that is 0x and XDC.
